

## QUALIFICATIONS PACK - OCCUPATIONAL STANDARDS FOR CAPITAL GOODS INDUSTRY

# What are **Occupational** Standards(OS)

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- OS are performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

#### Introduction

# **Qualifications Pack- CNC Setter and Operator - Electro** Discharge Machine (Spark Erosion)

**SECTOR/S: CAPITAL GOODS** 

#### SUB-SECTOR:

1. Machine Tools

2. Dies, Moulds and Press Tools

3. Plastics Manufacturing Machinery

4. Textile Manufacturing Machinery

**OCCUPATION:** Machining **REFERENCE ID:** CSC/Q0121

**ALIGNED TO: NCO-2004/NIL** 

Brief Job Description: It involves pre-setting the electrodes in tooling cartridges/ holders, positioning electrode cartridges/ holders in correct position, checking specific tool number or technology setting in the operating program, entering all relevant tooling data to the operating program, saving changes to program.

Personal Attributes: Basic communication, numerical and computational abilities. Openness to learning, ability to plan and organise own work and identify and solve problems in the course of working. Understanding the need to take initiative and manage self and work to improve efficiency and effectiveness.

| Job Role   | Setter and Operator - Computer Numerically ControlledElectro Discharge Machine (Spark Erosion)   |
|--|--|
| Role Description                                 | Perform setup operations on and operate computer numerically controlled (CNC) electro-discharge machine (EDM) (spark erosion, wire erosion), to modify a range of component shapes, as per given specifications.   |
| NSQF level                                       | 4  |
| Minimum Educational Qualifications               | 12 <sup>th</sup> Standard pass, preferably   |
| Maximum Educational Qualifications               | Not Applicable   |
| Prerequisite License or Training                 | No Previous Training Required  |
| Minimum Job Entry Age                            | 18 Years   |
| Experience                                       | Minimum 1 year as an CNC/NC EDM Operator   |
| Applicable National Occupational Standards (NOS) | <ol> <li>Compulsory:         <ol> <li>CSC/N0121 Set a computer numerically controlled electrodischarge machine for machining operations on metal components</li> <li>CSC/N0118 Perform machining operations on metal products using computer numercally controlled electrodischarge machine</li> <li>CSC/N1335 Use basic health and safety practices at the workplace</li> <li>CSC/N1336 Work effectively with others</li> </ol> </li> </ol> |
| Performance Criteria                             | As described in the relevant OS units  |

| Keywords /Terms                | Description   |
|--------------------------------|---|
| Sector                         | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.   |
| Sub-sector                     | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.  |
| Occupation                     | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.   |
| Job role                       | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.   |
| Occupational Standards (OS)    | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| Performance Criteria           | Performance criteria are statements that together specify the standard of performance required when carrying out a task.  |
| National Occupational          | NOS are occupational standards which apply uniquely in the Indian   |
| Standards (NOS)                | OR context.   |
| Qualifications Pack(QP)        | QP comprises the set of OSs, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.   |
| Electives                      | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives. |
| Options                        | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.   |
| Unit Code                      | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'   |
| Unit Title                     | Unit title gives a clear overall statement about what the incumbent should be able to do.   |
| Description                    | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.  |
| Scope                          | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.   |
| Knowledge and<br>Understanding | Knowledge and understanding are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual need to perform to the required standard.   |
| Organisational Context         | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.  |

| Technical Knowledge            | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.   |
|--------------------------------|--|
| Core Skills/ Generic<br>Skills | Core skills or generic skills are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. In the context of the OS, these include communication related skills that are applicable to most job roles. |

# National Occupational Standard

# **Overview**

This unit covers setting a computer numerically controlled (CNC) electro discharge machine (EDM) (spark erosion) for machining of metal components as per given specifications.

| Unit Code   | CSC/N0121   |
|-------------|---|
| Unit Title  | Set a computer numerically controlled electro-discharge machine for machining             |
| (Task)      | operations on metal components  |
| Description | This unit covers setting a CNC electro discharge machine (spark erosion) for machining    |
|             | of metal components by combining different operations as per given specifications. This   |
|             | involves pre-setting the electrodes in tooling cartridges/ holders, positioning electrode |
|             | cartridges/ holders in correct position, checking specific tool number ortechnology       |
|             | setting in the operating program.   |
| Scope       | This unit/task covers the following:  |
|             |   |
|             | Work safely   |
|             | <ul> <li>Prepare for setting up CNC EDM machine</li> </ul>                                |
|             | Setup CNC EDM machine for operations  |
|             | Deal with exigencies  |
|             |   |

## Performance Criteria (PC) w.r.t. the Scope

| Element             | Performance Criteria   |  |
|---------------------|--|--|
| Work safely         | To be competent, the user/individual on the job must be able to:                 |  |
|                     | PC1. comply with health and safety, environmental and other relevant regulations |  |
|                     | and guidelines at work   |  |
|                     | PC2. adhere to procedures and guidelines for personal protective equipment (PPE) |  |
|                     | and other relevant safety regulations while performing CNC operations            |  |
|                     | PC3. work following laid down procedures and instructions                        |  |
|                     | PC4. ensure work area is clean and safe from hazards                             |  |
|                     | PC5. ensure that all tools and equipment are in a safe and usable condition      |  |
| Prepare for setting | To be competent, the user/individual on the job must be able to:                 |  |
| up CNC EDM machine  | PC6. obtain job specification from a valid and approved source                   |  |
|                     | Valid sources: job instruction sheet/job card, work drawings and instructions,   |  |
|                     | planning documentation, quality control documents, operation sheets,             |  |
|                     | process specifications, instructions from supervisor                             |  |
|                     | PC7. read and establish job requirements from the job specification document     |  |
|                     | accurately   |  |
|                     | Job requirements:raw materials or components required (type, quality,            |  |
|                     | quantity); dimensions; limits and tolerances; surface texture requirements;      |  |
|                     | operations required (list, sequence and procedures where applicable); shape      |  |
|                     | or profiles to be machined; instruments and tools to be used;                    |  |
|                     | interdependencies; timelines   |  |
|                     | Job specification documents: detailed component drawings; approved               |  |
|                     | sketches/illustrations; national, international and organisational standards;    |  |
|                     | reference tables and charts; operational diagrams                                |  |

|               | machining operations on metal components   |
|---------------|--|
|               | PC8. report and rectify incorrect and inconsistent information in job specification    |
|               | documents as per organization procedures   |
|               | PC9. prepare the work area for the EDM machine setup as per procedure or               |
|               | operational specification  |
|               | PC10. conduct a preliminary check of the readiness of the CNC EDM machine              |
|               | Checks: e.g. machine is clean; position and alignment of the workpiece;                |
|               | lubrication is functioning; coolant level is correct; sub-systems are working          |
|               | correctly; etc.  |
|               | PC11. determine what has to be done and how the machine will be set to achieve         |
|               | this   |
|               | PC12. obtain appropriate measuring tools as per job requirements                       |
|               | PC13. ensure that all measuring equipment is calibrated and approved for usage         |
|               | PC14. check that the correct electrode is in place and is in usable condition          |
|               | PC15. ensure that the dielectric fluid is at an appropriate level                      |
|               | PC16. prepare the tooling as applicable to the machine type                            |
|               | Electro discharge machines: CNC Spark Erosion  |
| Setup CNC EDM | To be competent, the user/individual on the pb must be able to:                        |
| machine for   | PC17. pre-set electrodes in tooling holders manually or by using setting jigs/fixtures |
| operations    | PC18. position electrode holders in correct position on machine head or magazine       |
|               | PC19. check electrode holders have a specific tool number or technology setting in     |
|               | relation to the operating program  |
|               | PC20. enter all relevant tooling data to the operating program (eg. holder position,   |
|               | offsets)   |
|               | PC21. set electrode datam point  |
|               | PC22. save changes to program  |
|               | PC23. mount and set the required workholding devices, workpiece and electrode          |
|               | Securing workpieces: clamping direct to machine table; pneumatic or                    |
|               | magnetic table; machine vice (such as plain, swivel, universal); angle plate;          |
|               | vee block and clamps; fixtures; chucks (such as 3 or 4 jaw); ancillary indexing        |
|               | device   |
|               | PC24. position and secure workpieces to machine table using appropriate means          |
|               | PC25. select, load and set in the appropriate tool holding device for the appropriate  |
|               | electrodes   |
|               | Electrodes: plain electrodes, profile electrodes, hollow electrodes                    |
|               | PC26. set the machine tool operating parameters to achieve the component               |
|               | specification  |
|               | PC27. set up the machine in accordance with instructions and specifications            |
|               | Machine specifications: electrical conditions (such as current density, spark          |
|               | frequency); alignment of electrodes; filtration equipment; linear feeds and            |
|               | speeds; dielectric flow rates; ventilation and fume extraction; safety                 |

|                      | machining operations on metal components   |
|----------------------|--|
|                      | mechanisms/ devices  |
|                      | PC28. set up to produce machined components of various features which combine        |
|                      | different operations   |
|                      | Features: faces (angular, flat, square, parallel); threads; forms (concave,          |
|                      | convex, internal and external profiles, square/rectangular); holes (on pitch         |
|                      | circles, tapered); linear holes (rows, angles); engraving; cavities; radii/arcs;     |
|                      | parallel or tapered step/slots/shoulders; other special features                     |
|                      | PC29. set up to machine the components made from various ferrous and non-            |
|                      | ferrousmetals  |
|                      | Materials: ferrous, non-ferrous  |
|                      | PC30. conduct trial runs and adjust machine parameters and positioning till          |
|                      | accuracy parameters is as per required standards specified                           |
|                      | Accuracy parameters: dimensions, parallelism, angle/taper, squareness,               |
|                      | surface texture, profile, position   |
|                      | Standards: components to be free from false starts and sharp edges; surface          |
|                      | texture 0.008 mm; machined holes within H8; angles within +/- 0.5 degree;            |
|                      | flatness and squareness 0.025mm per 25mm   |
|                      | PC31. hand-over the machine after set-up to the machine operator along with          |
|                      | relevant instructions and documentation  |
|                      | PC32. complete relevant documentation as per organizational procedure                |
|                      | PC33. handle the typical problems that can occur with the setting up of the tooling, |
|                      | work-holding devices and proving the program   |
|                      | PC34. switch the CNC EDM machine on and off in normal and emergency situations       |
|                      | PC35. return the old cutting tools, workholding device, fixtures, instruments,       |
|                      |  |
|                      | drawings and verified tapes and programs back to store, safely and correctly         |
|                      | PC36. ensure that there is no damage to the tool/fixture while doing the prove-out   |
|                      | PC37. complete documentation during and post operations and submit as per            |
|                      | organizational procedures  |
|                      | PC38. shut down the equipment to a safe condition on conclusion of the activities.   |
|                      | PC39. leave the work area in a safe and tidy condition on completion of the          |
| D 1 111 1 1          | fittingactivities  |
| Deal with exigencies | To be competent, the user/individual on the job must be able to:                     |
|                      | PC40. deal promptly and effectively with problems within span of responsibility      |

#### **Plan and Organize**

The user/individual on the job needs to know and understand how to:

- SB1. plan, prioritize and sequence work operations as per job requirements
- SB2. organize and analyze information relevant to work
- SB3. basic concepts of shop-floor work productivity including waste reduction, efficient material usage and optimization of time

#### CustomerCentricity

The user/individual on the job needs to know and understand how to:

- SB4. exercise restraint while expressing dissent and during conflict situations
- SB5. avoid and manage distractions to be disciplined at work
- SB6. manage own time for achieving better results
- SB7. work in a team in order to achieve better results
- SB8. identify and clarify work roles within a team
- SB9. communicate and cooperate with others in the team for better results
- SB10. seek assistance from fellow team members

#### **Problem Solving**

The user/individual on the job needs to know and understand how to:

- SB11. identify problems with work planning, procedures, output and behavior and their implications
- SB12. prioritize and plan for problem solving
- SB13. communicate problems appropriately to others
- SB14. identify sources of information and support for problem solving
- SB15. seek assistance and support from other sources to solve problems
- SB16. identify effective resolution techniques
- SB17. select and apply resolution techniques
- SB18. seek evidence for problem resolution

#### **Analytical Thinking**

The user/individual on the job needs to know and understand how to:

- SB19. undertake and express new ideas and initiatives to others
- SB20. modify work plan to overcome unforeseen difficulties or developments that occur as work progresses
- SB21. participate in improvement procedures including process, quality and internal/external customer/supplier relationships
- SB22. enhance one's competencies in new and different situations and contexts to achieve more

#### **Critical Thinking**

The user/individual on the job needs to know and understand how to:

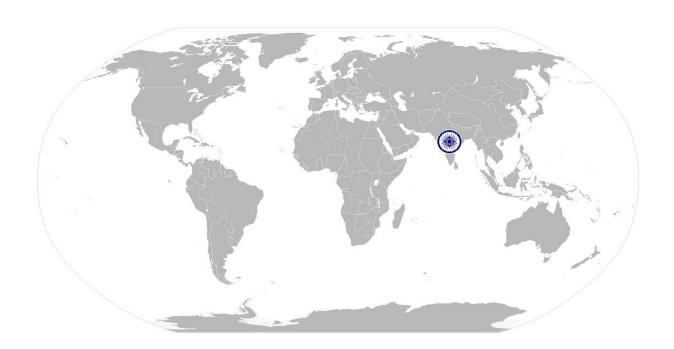

| maching operations on metal components |  |  |  |  |
|--|--|--|--|--|
|  | SB23. participate in on-the-job and other learning, training and development     |  |  |  |
|  | interventions and assessments  |  |  |  |
|  | SB24. clarify task related information with appropriate personnel or technical   |  |  |  |
|  | adviser  |  |  |  |
|  | SB25. seek to improve and modify own work practices                              |  |  |  |
|  | SB26. maintain current knowledge of application standards, legislation, codes of |  |  |  |
|  | practice and product/process developments  |  |  |  |

controlled electro-discharge machine

# National Occupational Standard

## **Overview**

This unit covers machining of a range of component shapes using computer numerically controlled (CNC) electro-discharge machines (EDM) (spark erosion), as per given specifications.

| <u> </u>    |  |  |  |  |  |  |  |
|-------------|--|--|--|--|--|--|--|
| Unit Code   | CSC/N0118  |  |  |  |  |  |  |
| Unit Title  | Perform machining operations on metal products using computernumerically             |  |  |  |  |  |  |
| (Task)      | controlled electro-discharge machine   |  |  |  |  |  |  |
| Description | This unit covers machining of a range of component shapes using Computer Numerica    |  |  |  |  |  |  |
|             | Control (CNC) electro-discharge machines (EDM), (spark erosion), as per given        |  |  |  |  |  |  |
|             | specifications. The candidate will be expected to produce a range of components that |  |  |  |  |  |  |
|             | cover a number of different features.  |  |  |  |  |  |  |
| Scope       | This unit/task covers the following:   |  |  |  |  |  |  |
|             | Work safety  |  |  |  |  |  |  |
|             | Prepare machine for operations   |  |  |  |  |  |  |
|             | Carry out machine operations   |  |  |  |  |  |  |
|             | Test for accuracy  |  |  |  |  |  |  |
|             | Deal with contingencies  |  |  |  |  |  |  |

## Performance Criteria(PC) w.r.t. the Scope

| Element             | Performance Criteria  |  |  |  |  |  |
|---------------------|---|--|--|--|--|--|
|                     |   |  |  |  |  |  |
| Work safely         | To be competent, the user/individual on the job must be able to:  |  |  |  |  |  |
|                     | PC1. work safely at all times, complying with health and safety and other relevant  |  |  |  |  |  |
|                     | regulations and guidelines  |  |  |  |  |  |
|                     | PC2. adhere to procedures or systems in place for health and safety, personal   |  |  |  |  |  |
|                     | protective equipment (PPE) and other relevant safety regulations  |  |  |  |  |  |
|                     | PC3. ensure machine guards are in place and correctly adjusted  |  |  |  |  |  |
| Prepare machine for | To be competent, the user/individual on the job must be able to:  |  |  |  |  |  |
| operations          | PC4. read and establish job requirements from the job specification document  |  |  |  |  |  |
|                     | Job requirements:raw materials or components required (type, quality,   |  |  |  |  |  |
|                     | quantity); dimensions; limits and tolerances; surface texture requirements;   |  |  |  |  |  |
|                     | operations required (list, sequence and procedures where applicable); shap or profiles to be machined; tools to be used; interdependencies; timelines |  |  |  |  |  |
|                     |   |  |  |  |  |  |
|                     | obtain and use the appropriate job specification documentation and  |  |  |  |  |  |
|                     | specifications from valid source  |  |  |  |  |  |
|                     | Job specification documents: detailed component drawings; approved  |  |  |  |  |  |
|                     | sketches/illustrations; national, international and organizational standards;   |  |  |  |  |  |
|                     | reference tables and charts; operational diagrams   |  |  |  |  |  |
|                     | PC5. carry out preliminary check and confirm the machine readiness for the  |  |  |  |  |  |
|                     | machining activities to be carried out  |  |  |  |  |  |
|                     | Electro discharge machines:CNC Spark Erosion  |  |  |  |  |  |
|                     | Preliminary check: machine is clean, referencing-zero return, lubrication are   |  |  |  |  |  |
|                     | functioning, coolant level is correct, sub-systems are working correctly,   |  |  |  |  |  |
|                     | confirmation received from the machine setter that the machine is ready for   |  |  |  |  |  |

|                   | controlled electro-discharge machine  |
|-------------------|---|
|                   | production  |
|                   | PC6. obtain and use the appropriate job specification documentation and             |
|                   | specifications from valid source  |
|                   | Valid sources: job instruction sheet/job card; work drawings and instructions;      |
|                   | planning documentation; quality control documents; operation sheets;                |
|                   | process specifications; instructions from supervisor                                |
|                   | PC7. use and extract information from reference charts, tables, graphs and          |
|                   | standards   |
|                   | Information pertaining to: tapping sizes and threads; component ratings;            |
|                   | machining symbols and tolerances  |
|                   | PC8. seek any necessary instructions/support/information on the operation of the    |
|                   | machine, where appropriate  |
|                   | PC9. hold components securely without distortion                                    |
|                   | PC10. check that the correct electrode is in place and is in usable condition       |
|                   | PC11. ensure that the dielectric fluid is at an appropriate level                   |
|                   | PC12. check that the operating program is at the correct start point                |
|                   | PC13. ensure that the workpiece is clear of the tooling before starting the machine |
| Carry out machine | To be competent, the user/individual on the ob must be able to:                     |
| operations        | PC14. follow the defined procedures for starting and running the operating system   |
|                   | PC15. ensure that machine settings are adjusted as and when required to maintain    |
|                   | the required accuracy   |
|                   | PC16. produce component shapes on a range of materials                              |
|                   | Range of materials:Ferrous: e.g. low, medium and high carbon steels; low            |
|                   | alloy steels; stainless steels; cast irons; Non-ferrous: e.g. aluminum and          |
|                   | aluminum alloy; bronze; silicon carbide; etc.                                       |
|                   | PC17. produce machined components with the required features                        |
|                   | Features: faces (square, flat, parallel, angular); threads; forms (concave,         |
|                   | convex, square, rectangular); holes (tapered, on pitch circles, rows, angles);      |
|                   | engraving; internal and external profile forms; cavities; radii/arcs; parallel or   |

|                                      | The user/individual on the job needs to know and understand how to:   |  |  |  |  |  |
|                                      | SA2. fill up appropriate technical forms, process charts, activity logs as per  |  |  |  |  |  |
|                                      | organizational format in English and/or local language  |  |  |  |  |  |
|                                      | SA3. undertake basic numerical computations and calculations  |  |  |  |  |  |
|                                      | Numerical computations: addition, subtraction, multiplication, division,  |  |  |  |  |  |
|                                      | fractions and decimals, percentages and proportions, simple ratios and  |  |  |  |  |  |
|                                      | averages  |  |  |  |  |  |
|                                      | SA4. identify various basic, compound and solid shapes as per dimensions given  |  |  |  |  |  |
|                                      | Basic shapes: square, rectangle, triangle, circle, quadrilaterals   |  |  |  |  |  |
|                                      | Compound shapes: involving squares, rectangles, triangles, circles,   |  |  |  |  |  |
|                                      | semicircles, quadrants of a circle  |  |  |  |  |  |
|                                      | Solid shapes: cube, rectangular prism, cylinder   |  |  |  |  |  |
|                                      | SA5. use appropriate measuring techniques and units of measurement  |  |  |  |  |  |
|                                      |   |  |  |  |  |  |
|                                      | SA6. use appropriate units and number systems to express degree of accuracy  Units and number systems representing degree of accuracy: decimals places, |  |  |  |  |  |
|                                      | significant figures, fractions as a decimal quantity  |  |  |  |  |  |
|                                      | SA7. use metric systems of measurement  |  |  |  |  |  |
|                                      |   |  |  |  |  |  |
|                                      | Oral Communication (Listening and Speaking skills)  |  |  |  |  |  |
|                                      | The user/individual on the job needs to know and understand how to:  SA8. convey and share technical information clearly using appropriate language     |  |  |  |  |  |
|                                      |   |  |  |  |  |  |
|                                      | SA9. check and clarify task-related information   |  |  |  |  |  |
|                                      | SA10. liaise with appropriate authorities using correct protocol  |  |  |  |  |  |
|                                      | SA11. communicate with people in respectful form and manner in line with  |  |  |  |  |  |
|                                      | organizational protocol   |  |  |  |  |  |
| B. Professional Skills               | Decision Making   |  |  |  |  |  |
|                                      | NA  |  |  |  |  |  |
|                                      | Plan and Organize   |  |  |  |  |  |
|                                      | The user/individual on the job needs to know and understand how to:   |  |  |  |  |  |
|                                      | SB1. plan, prioritize and sequence work operations as per job requirements  |  |  |  |  |  |
|                                      | SB2. organize and analyze information relevant to work  |  |  |  |  |  |
|                                      | SB3. basic concepts of shop-floor work productivity including waste reduction,  |  |  |  |  |  |
|                                      | efficient material usage and optimization of time   |  |  |  |  |  |
|                                      |   |  |  |  |  |  |

| Custo | mor | Con | tric | itv |
|-------|-----|-----|------|-----|
| Custo | mer | cen | uric | ILV |

The user/individual on the job needs to know and understand how to:

- SB4. exercise restraint while expressing dissent and during conflict situations
- SB5. avoid and manage distractions to be disciplined at work
- SB6. manage own time for achieving better results
- SB7. work in a team in order to achieve better results
- SB8. identify and clarify work roles within a team
- SB9. communicate and cooperate with others in the team for better results
- SB10. seek assistance from fellow team members

#### **Problem Solving**

The user/individual on the job needs to know and understand how to:

- SB11. identify problems with work planning, procedures, output and behavior and their implications
- SB12. prioritize and plan for problem solving
- SB13. communicate problems appropriately to others
- SB14. identify sources of information and support for problem solving
- SB15. seek assistance and support from other sources to solve problems
- SB16. identify effective resolution techniques
- SB17. select and apply resolution techniques
- SB18. seek evidence for problem resolution

#### **Analytical Thinking**

The user/individual on the job needs to know and understand how to:

- SB19. undertake and express new ideas and initiatives to others
- SB20. modify work plan to overcome unforeseen difficulties or developments that occur as work progresses
- SB21. participate in improvement procedures including process, quality and internal/external customer/supplier relationships
- SB22. enhance one's competencies in new and different situations and contexts to achieve more

#### **Critical Thinking**

The user/individual on the job needs to know and understand how to:

- SB23. participate in on-the-job and other learning, training and development interventions and assessments
- SB24. clarify task related information with appropriate personnel or technical adviser
- SB25. seek to improve and modify own work practices
- SB26. maintain current knowledge of application standards, legislation, codes of practice and product/process developments

Use basic health and safety practices at the workplace

# National Occupational Standard

## **Overview**

This unit covers health, safety and security at the workplace. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment.

**Unit Code** 

Unit Title

## CSC/N1335 Use basic health and safety practices at the workplace

CSC/N1335

| Unit Title<br>(Task)   | Use basic health and safety practices at the workplace  |  |
|------------------------|---|--|
| Description            | This OS unit is about knowledge and practices relating to health, safety and security   |  |
|                        | that candidates need to use in the workplace. It covers responsibilities towards self,  |  |
|                        | others, assets and the environment. It includes understanding of risks and hazards in   |  |
|                        | the workplace, along with common techniques to minimize risk, deal with accidents,  |  |
|                        | emergencies, etc.   |  |
| Scope                  | This unit/task covers the following:  |  |
|                        | Health and safety   |  |
|                        | Fire safety   |  |
|                        | <ul> <li>Emergencies, rescue and first-aid procedure</li> </ul>   |  |
| Performance Criteria(P | C) w.r.t. the Scope   |  |
| Element                | Performance Criteria  |  |
| Health and safety      | To be competent, the user/individual on the job must be able to:  PC1. use protective clothing/equipment specific tasks and work conditions  Protective clothing: leather or asbestos gloves, flame proof aprons, flame  proof overalls buttoned to neck, cuffless (without folds), trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visors  Equipment: hand shields, machine guards, residual current devices, shields, dust sheets, respirator  PC2. state the name and location of people responsible for health and safety in the workplace  PC3. state the names and location of documents that refer to health and safety in the workplace  PC4. identify job-site hazardous work and state possible causes of risk or accident in the workplace  Hazards: sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; welding radiation; hazardous surfaces (sharp, slippery, uneven, chipped, broken, etc.); hazardous substances(chemicals, gas, oxy-fuel, fumes, dust, etc.); physical hazards(working at heights, large and heavy objects and machines, sharp and piercing objects, tolls and machines, intense light, load noise, obstructions in corridors, by doors, blind turns, noise, over stacked shelves and packages, etc.) electrical hazards (power supply and points, loose |  |

#### CSC/N1335 Use basic health and safety practices at the workplace

- giving instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness)
- PC5. carry out safe working practices while dealing with hazards to ensure the safety of self and others
  - Safe working practices: using protective clothing and equipment; putting up and reading safety signs; handle tools in the correct manner and store and maintain them properly; keep work area clear of clutter, spillage and unsafe object lying casually; while working with electricity take all electrical precautions like insulated clothing, adequate equipment insulation, use of control equipment, dry work area, switch off the power supply when not required, etc.; safe lifting and carrying practices; use equipment that is working properly and is well maintained; take due measures for safety while working in confined places, trenches or at heights, etc. including safety harness, fall arrestors, etc.
- PC6. state methods of accident prevention in the work environment of the job role Methods of accident prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices, advice; instruction from colleagues and supervisors
- PC7. state location of general health and safety equipment in the workplace General health and safety equipment: fire extinguishers; first aid equipment; safety instruments and clothing; safety installations (eg fire exits, exhaust fans)
- PC8. inspect for faults, set up and safely use steps and ladders in general use Ladder faults: corrosion of metal components, deterioration, splits and cracks timber components, imbalance, loose rungs, missing/ unfixed nuts or bolts, etc.
  - Ladders set up: firm/level base, clip/lash down, leaning at the correct angle, etc.
- PC9. work safely in and around trenches, elevated places and confined areas
- PC10. lift heavy objects safely using correct procedures
- PC11. apply good housekeeping practices at all times

  Good housekeeping practices: clean/tidy work areas, removal/disposal of waste products, protect surfaces
- PC12. identify common hazard signs displayed in various areas

  Various areas: on chemical containers; equipment; packages; inside buildings; in open areas and public spaces, etc.
- PC13. retrieve and/or point out documents that refer to health and safety in the workplace

| CSC/N1335 Us        | se basic health and safety practices at the workplace                                    |
|---------------------|--|
|                     | Documents: fire notices, accident reports, safety instructions for equipment             |
|                     | and procedures, company notices and documents, legal documents (eg                       |
|                     | government notices)  |
| Fire safety         | To be competent, the user/individual on the job must be able to:                         |
|                     | PC14. use the various appropriate fire extinguishers on different types of fires         |
|                     | correctly  |
|                     | Types of fires: Class A: eg. ordinary solid combustibles, such as wood, paper,           |
|                     | cloth, plastic, charcoal, etc.; Class B: flammable liquids and gases, such as            |
|                     | gasoline, propane, diesel fuel, tar, cooking oil, and similar substances; Class C:       |
|                     | eg. electrical equipment such as appliances, wiring, breaker panels, etc.                |
|                     | (These categories of fires become Class A, B, and D fires when the electrical            |
|                     | equipment that initiated the fire is no longer receiving electricity); Class D:          |
|                     | combustible metals such as magnesium, titanium, and sodium (These fires                  |
|                     | burn at extremely high temperatures and require special suppression agents)              |
|                     | PC15. demonstrate rescue techniques applied during fire hazard                           |
|                     | PC16. demonstrate good housekeeping in order to prevent fire hazards                     |
|                     | PC17. demonstrate the correct use of a fire extinguisher                                 |
| Emergencies, rescue | To be competent, the user/individual on the job must be able to:                         |
| and first-aid       | PC18. demonstrate how to free a person electrocution                                     |
| procedures          | PC19. administer appropriate first aid to victims where required eg. in case of          |
|                     | bleeding, burns, choking, electric shock, poisoning etc.                                 |
|                     | PC20. demonstrate basic techniques of bandaging  |
|                     | PC21. respond promptly and appropriately to an accident situation or medical             |
|                     | emergency in real or simulated environments  |
|                     | PC22. perform and organize loss minimization or rescue activity during an accident       |
|                     | in real or simulated environments  |
|                     | PC23. administer first aid to victims in case of a heart attack or cardiac arrest due to |
|                     | electric shock, before the arrival of emergency services in real or simulated            |
|                     | cases  |
|                     | PC24. demonstrate the artificial respiration and the CPR Process                         |
|                     | PC25. participate in emergency procedures  |
|                     | Emergency procedures: raising alarm, safe/efficient, evacuation, correct                 |
|                     | means of escape, correct assembly point, roll call, correct return to work               |
|                     | PC26. complete a written accident/incident report or dictate a report to another         |
|                     | person, and send report to person responsible  |
|                     | Incident Report includes details of: name, date/time of incident, date/time of           |
|                     | report, location, environment conditions, persons involved, sequence of                  |
|                     | events, injuries sustained, damage sustained, actions taken, witnesses,                  |
|                     | supervisor/manager notified  |
|                     | PC27. demonstrate correct method to move injured people and others during an             |

|                      | SA4. write an accident/incident report in local language or English  Communication Skills |  |  |
|                      | Communication Skins   |  |  |
|                      | The user/individual on the job needs to know and understand how to:                       |  |  |
|                      | SA5. question coworkers appropriately in order to clarify instructions and other          |  |  |
|                      | issues  |  |  |
|                      | SA6. give clear instructions to coworkers, subordinates others                            |  |  |
| B. Professional Skil | Is Decision Making  |  |  |
|                      | The user/individual on the job needs to know and understand how to:                       |  |  |
|                      | SB1. make appropriate decisions pertaining to the concerned area of work with             |  |  |
|                      | respect to intended work objective, span of authority, responsibility, laid               |  |  |
|                      | down procedure and guidelines   |  |  |
|                      | Plan and Organize   |  |  |
|                      | The user/individual on the job needs to know and understand how to:                       |  |  |
|                      | SB2. plan and organize their own work schedule, work area, tools, equipment and           |  |  |
|                      | materials to maintain decorum and for improved productivity                               |  |  |

#### CSC/N1335 Use basic health and safety practices at the workplace

#### **Customer Centricity**

The user/individual on the job needs to know and understand how to:

- SB3. remain congenial while discussing and debating issues with co-workers
- SB4. follow appropriate protocols for communication based on situation, hierarchy, organizational culture and practice
- SB5. ask for, provide and receive required assistance where possible to ensure achievement of work related objectives
- SB6. thank coworkers for any assistance received
- SB7. offer appropriate respect based on mutuality and respect for fellow workmanship and authority

#### **Problem Solving**

The user/individual on the job needs to know and understand how to:

- SB8. think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- SB9. identify immediate or temporary solutions to resolve delays
- SB10. identify sources of support that can be availed of for problem solving for various kind of problems
- SB11. seek appropriate assistance from other sources to resolve problems
- SB12. report problems that you cannot resolve to appropriate authority

#### **Analytical Thinking**

The user/individual on the job needs to know and understand how to:

- SB13. identify cause and effect relations in their area of work
- SB14. use cause and effect relations to anticipate potential problems and their solution

#### **Critical Thinking**

NA

Work effectively with others

# National Occupational Standard

# **Overview**

This unit covers basic practices that improve effectiveness of working with others in an organizational set-up.

## Work effectively with others

| Turk orde   | oce hugge   |
|---|---|
| Unit Code   | CSC/N1336   |
| Unit Title<br>(Task)                                  | Work effectively with others  |
| Description   | This unit covers basic etiquette and competencies that a candidate is required to possess and demonstrate in their behavior and interactions with others at the workplace. These cover areas such as communication etiquette, discipline, listening etc.  |
| Scope   | This unit/task covers the following:  • Work effectively with others  |
| Performance Criteria(P                                | C) w.r.t. the Scope   |
| Element   | Performance Criteria  |
| Work effectively with others                          | To be competent, the user/individual on the job must be able to: PC1. accurately receive information and instructions from the supervisor and fellow workers, getting clarification where required PC2. accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt PC3. give information to others clearly, at a pace and in a manner that helps them to understand PC4. display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible PC5. consult with and assist others to maximize effectiveness and efficiency in carrying out tasks PC6. display appropriate communication etiquette while working Communication etiquette: do not use abusive language; use appropriate titles and terms of respect; do not eat or chew while talking (vice versa)etc. PC7. display active listening skills while interacting with others at work PC8. use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism PC9. demonstrate responsible and disciplined behaviors at the workplace Disciplined behaviors: e.g. punctuality; completing tasks as per given time and standards; not gossiping and idling time; eliminating waste, honesty, etc. PC10. escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict |
| Knowledge and Unders                                  | 2.7.7   |
| A. Organizational Context (Knowledge of the company / | The user/individual on the job needs to know and understand:  KA1. legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions  KA2. reporting structure, inter-dependent functions, lines and procedures in the   |

[Insert 3 letter codes for SSC]

Q denoting Qualifications Pack

#### **Occupational Standard**

Back to top...

The following acronyms/ codes have been used in the nomenclature above:

| Sub-sector                      | Range of Occupation numbers |  |
|---------------------------------|-----------------------------|--|
| Machine Tools                   | 01-13                       |  |
| Dies, Moulds and Press Tools    | 01-13                       |  |
| Plastic Manufacturing Machinery | 01-13                       |  |
| Textile Manufacturing Machinery | 01-13                       |  |
| Process Plant Machinery         | 01-13                       |  |
| Electrical and Power Machinery  | 01-13                       |  |
| Light Engineering Goods         | 01-13                       |  |

| Sequence         | Description               | Example |
|------------------|---------------------------|---------|
| Three letters    | Capital Goods             | CSC     |
| Slash            | /                         | /       |
| Next letter      | Whether <b>Q</b> P or NOS | N       |
| Next two numbers | Occupation code           | 01      |
| Next two numbers | OS number                 | 01      |

#### **Criteria For Assessment Of Trainees**

Job Role: CNC Setter and Operator - Electro Discharge Machine (Spark Erosion)

**Qualification Pack:** CSC/Q0121

Sector Skill Council: Capital Goods Skill Council

#### **Guidelines for Assessment**

- 1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
- 2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
- 3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
- 4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
- 5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criterion.
- 6. To pass the Qualification Pack , every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.
- 7. In case of *unsuccessful completion*, the trainee may seek reassessment on the Qualification Pack.

| Compulsory NOS Total Marks: 400                                   |   |                | Marks Allocation |        |                     |
|---|---|----------------|------------------|--------|---------------------|
| Assessment outcomes   | Assessment Criteria for outcomes  | Total<br>Marks | Out<br>of        | Theory | Skills<br>Practical |
| CSC/N0121 Set a computer numerically controlled electro-discharge | PC1.comply with health and safety, environmental and other relevant regulations and guidelines at work  | 100            | 2                | 0      | 2                   |
|   | PC2.adhere to procedures and guidelines for personal protective equipment (PPE) and other relevant safety regulations while performing CNC operations |                | 2                | 0      | 2                   |
