What are Occupational Standards(OS)?

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- OS are performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

Introduction

Qualifications Pack: Calibration Technician

SECTOR: CAPITAL GOODS

SUB-SECTOR:

- | | |
|------------------------------------|-----------------------------------|
| 1. Machine Tools | 4. Process Plant Machinery |
| 2. Plastic Manufacturing Machinery | 5. Electrical and Power Machinery |
| 3. Textile Manufacturing Machinery | 6. Light Engineering Goods |

OCCUPATION: Calibration and Instrumentation

REFERENCE ID: CSC/ Q 0801

ALIGNED TO: NCO-2004/ 7311.67

Calibration Technician: Perform testing and calibration of measuring and control equipment for correct operation in accordance with pre-determined procedures.

Brief Job Description: It covers setting, adjustment, validation or verification of mechanical, pneumatic, hydraulic, electrical, electronic, measuring and control instruments using reference standards in accordance with predetermined standard procedures.

Personal Attributes: Basic communication, numerical and computational abilities. Openness to learning, ability to plan and organize own work and identify and solve problems in the course of working. Understanding the need to take initiative and manage self and work to improve efficiency and effectiveness

Job Details	Qualifications Pack Code	CSC/ Q 0801		
	Job Role	Calibration Technician		
	Credits NSQF	TBD	Version number	1.0
	Sector	CAPITAL GOODS	Drafted on	10/04/14
	Sub-sector	<ol style="list-style-type: none"> 1. Machine Tools 2. Plastic Manufacturing Machinery 3. Textile Manufacturing Machinery 4. Process Plant Machinery 5. Electrical and Power Machinery 6. Light Engineering Goods 	Last reviewed on	18/03/15

Job Role	Calibration Technician
Role Description	Setting, adjustment, validation or verification of mechanical, pneumatic, hydraulic, electrical, electronic measuring and control instruments for correct operation in accordance with pre-determined procedures.
NSQF level	4
Minimum Educational Qualifications	Diploma(10+) – Mechanical, Electrical, Electronic / Mechatronics
Maximum Educational Qualifications	N.A.
Training (Suggested but not mandatory)	No Previous Training Required
Minimum Job Entry Age	18 Years Old
Experience	No Previous Experience Required
Applicable National Occupational Standards (NOS)	<p>Compulsory:</p> <ol style="list-style-type: none"> CSC/ N 0801 (Calibrate hydraulic, pneumatic and mechanical measuring and control equipment) CSC/ N 0802 (Calibrate electrical and electronic measuring and control equipment) CSC/ N 1335 (Use basic health and safety practices at the workplace) CSC/ N 1336 (Work effectively with others) <p>Optional: N.A.</p>
Performance Criteria	As described in the relevant OS units

Keywords /Terms	Description
Core Skills/Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the NOS, these include communication related skills that are applicable to most job roles.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of NOS.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
National Occupational Standards (NOS)	NOS are Occupational Standards which apply uniquely in the Indian context
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Organisational Context	Organisational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
Qualifications Pack(QP)	Qualifications Pack comprises the set of NOS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
Scope	Scope is the set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on the quality of performance required.
Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-Sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Sub-functions	Sub-functions are sub-activities essential to fulfil the achieving the objectives of the function.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Unit Code	Unit Code is a unique identifier for a NOS unit, which can be denoted with an 'N'
Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Vertical	Vertical may exist within a sub-sector representing different domain areas or the client industries served by the industry.

Acronyms	Keywords /Terms	Description
	AC / DC	Alternating Current / Direct Current
	RLC	Units of Resistance, Inductance and Capacitance respectively
	CO2	Carbon dioxide
	CPR	Cardiac Pulmonary Resuscitation
	PPE	Personal Protective Equipment

CSC/ N 0801: Calibrate hydraulic, pneumatic and mechanical measuring and control equipment

National Occupational Standard

Overview

This unit covers setting, adjustment, validation or verification of mechanical, pneumatic, hydraulic measuring and control instruments.

CSC/ N 0801: Calibrate mechanical, hydraulic and pneumatic measuring and control equipment

National Occupational Standard	Unit Code	CSC / N 0801
	Unit Title (Task)	Calibrate mechanical, hydraulic and pneumatic measuring and control equipment
	Description	<p>This unit covers setting, adjustment, validation or verification of mechanical, pneumatic, hydraulic, measuring and control instruments using reference standards in accordance with predetermined procedures.</p> <p>The candidate will be expected to work with minimal supervision, taking personal responsibility for own actions, and for the quality and accuracy of the work carried out.</p>
	Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> • Working safely • Checking equipment for correct operation • Testing measure and control equipment • Analysing and reporting test results • Calibrating measuring and control equipment
Performance Criteria(PC) w.r.t. the Scope		
Element	Performance Criteria	
Working safely	<p>The user/individual on the job should be able to:</p> <p>PC1. comply with health and safety, environmental and other relevant regulations and guidelines at work</p> <p>PC2. adhere to procedures and guidelines for personal protective equipment (PPE) and other relevant safety regulations while performing calibration operations</p> <p>PC3. work following laid down procedures and instructions</p> <p>PC4. ensure work area is clean and safe from hazards</p> <p>PC5. ensure that all tools, equipment, power tool cables, extension leads are in a safe and usable condition</p>	
Checking equipment for correct operation	<p>The user/individual on the job should be able to:</p> <p>PC6. check components, leads, fasteners, etc. for wear, loose connections or other faults</p>	
Testing measure and control equipment	<p>The user/individual on the job should be able to:</p> <p>PC7. prepare and update relevant testing/calibration schedules and plans</p> <p>PC8. carry out the testing/calibration activities in the specified sequence and in an agreed timescale</p> <p>Testing/calibration activities: visual inspection of the instrument for completeness and freedom from damage or foreign objects; standard serviceability test/calibration; special-to-type tests; operational/function checks; gauge repeatability and reliability tests; statistical process control methods</p> <p>PC9. identify work/test requirements and define are per standard operating procedures</p> <p>PC10. inspect and test the operation of instruments and systems to diagnose faults using testing devices</p> <p>PC11. select correct test application principles after inspection of instrumentation</p>	

CSC/ N 0801: Calibrate mechanical, hydraulic and pneumatic measuring and control equipment

	<p>systems, equipment/components</p> <p>PC12. select appropriate test equipment in accordance with defined requirements</p> <p>PC13. observe device isolation methods/requirements and localize</p> <p>PC14. apply appropriate test procedures and application principles in assessing operation of instrumentation systems, equipment/components</p> <p>PC15. report any instances where the testing/calibration activities cannot be fully met or where there are identified defects outside the planned schedule</p> <p>PC16. complete relevant testing/calibration documentation accurately</p>
Analyzing and reporting test results	<p>The user/individual on the job should be able to:</p> <p>PC17. analyse and verify test results against operational specifications to identify and localise faults</p> <p>PC18. report potential and real faults using standard operating procedures</p> <p>PC19. evaluate faulty conditions and plan corrective action</p> <p>PC20. record action plan and document according to standard operating procedures</p>
Calibrating measuring and control equipment	<p>The user/individual on the job should be able to:</p> <p>PC21. assess calibration of measuring and control equipment to manufacturers' specifications and/or standard operating procedures Instrumentation control equipment: for weight (eg. mechanical systems, load cells/strain gauges, transducers); speed measurement equipment; speed control equipment (eg. mechanical governors,); valves and valve mechanisms (eg. control valves, valve actuators and positioners); other specific instrumentation</p> <p>PC22. calibrate equipment against appropriate physical standards using correct calibration tools, equipment, techniques using predetermined procedures Testing and calibrating tools: pressure gauge; standard test gauges; micrometers; jigs and fixtures; templates and patterns; insulation testers; calibrated weights; vernier caliper; dead weight tester; test gauges, manometers; gyroscope</p> <p>PC23. undertake zero, span and range checks on indicators/controllers using correct and appropriate configuration</p> <p>PC24. perform methods of adjustment using calibration devices and document prescribed procedures and operational specifications</p> <p>PC25. re-commission equipment in accordance with standard operating procedures</p> <p>PC26. obtain help or advice from specialist if the problem is outside his/her area of competence or experience</p> <p>PC27. monitor the problem and keep the supervisor informed about progress or any delays in resolving the problem</p> <p>PC28. complete documentation post operations as per organizational procedures Documentation: job card, progress records, incident reports, calibration labels, test reports, nonconforming calibration reports, calibration certificates, etc</p>
Knowledge and Understanding (K)	
A. Organizational Context (Knowledge of the company /	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions</p> <p>KA2. relevant health and safety requirements applicable in the work place</p>

CSC/ N 0801: Calibrate mechanical, hydraulic and pneumatic measuring and control equipment

<p>organization and its processes)</p>	<p>KA3. importance of working in clean and safe environment KA4. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities KA5. reporting structure, inter-dependent functions, lines and procedures in the work area KA6. relevant people and their responsibilities within the work area KA7. escalation matrix and procedures for reporting work and employment related issues KA8. documentation and related procedures applicable in the context of employment and work KA9. importance and purpose of documentation in context of employment and work</p>
<p>B. Technical Knowledge</p>	<p>The user/individual on the job needs to know and understand: KB1. knowledge of standards, legislative or regulatory requirements applicable to the measuring equipment and/or its calibration KB2. standard operating procedures for calibrating the measuring equipment and the tools and equipment required to do so KB3. standard operating procedures for commissioning the measuring equipment KB4. calibration records to be kept/maintained in accordance with standard operating procedures KB5. measuring equipment specifications, operation, wearing parts, connections and components KB6. using appropriate tools and equipment to check measuring equipment for faults KB7. using appropriate techniques to check the calibration of the measuring equipment for conformance to specifications KB8. calibrating the measuring equipment against the appropriate physical standard KB9. re-commissioning the measuring equipment KB10. checks that are to be made of the measuring equipment and the tools and equipment to be used when checking the measuring equipment KB11. common fault(s) that may be found in the measuring equipment KB12. effects of faults on the performance/accuracy of the measuring equipment KB13. hazards and controls associated with calibrating measuring equipment KB14. functionality of the equipment and tolerance levels for calibration KB15. instrumentation principles (eg. controlling density, level, flow, temperature, composition of a range of materials) KB16. principles of hydraulic and pneumatic flow KB17. application principles in assessing operation of instrumentation systems, equipment/components KB18. procedures and equipment for inspecting and testing instrumentation system KB19. calibration procedures of instrumentation systems and equipment/components KB20. purpose/operational function of instrumentation system KB21. specifications of each instrumentation system and acceptable deviations from specifications KB22. procedures for repairing faulty instrumentation system</p>

CSC/ N 0801: Calibrate mechanical, hydraulic and pneumatic measuring and control equipment

	<p>KB23. dismantling, reassembly and testing techniques</p> <p>KB24. correct operation of the instrumentation system including the procedures for isolating instrumentation systems</p> <p>KB25. range of faults in instrumentation system/equipment components</p> <p>KB26. procedures for checking and verifying the operational function of the instrumentation system/equipment</p> <p>KB27. procedures for recording and completing service reports</p> <p>KB28. operational specifications of the instrumentation system/equipment</p> <p>KB29. variations between test results and operational specifications</p> <p>KB30. probable causes of faults in instrumentation system/equipment components</p> <p>KB31. action to be taken to rectify the causes of faults in instrumentation systems/equipment</p> <p>KB32. sequence of events to be undertaken to correct faults in the instrumentation system/equipment components</p> <p>KB33. methods of determining procedures</p> <p>KB34. procedures for reporting faults</p> <p>KB35. difference between real and potential faults</p> <p>KB36. procedures for recording/documenting test and calibration results</p> <p>KB37. function and procedures for zero, span and range checks on instrumentation systems/equipment</p> <p>KB38. equipment required to carry out the calibration of instrumentation systems/equipment</p>
Skills (S) [Optional]	
A. Core Skills/ Generic Skills	Communication
	<p>The user/ individual on the job needs to know and understand how to:</p> <p>SA1. read and interpret information correctly from various job specification documents, manuals, health and safety instructions, memos, etc. applicable to the job in English and/or local language</p> <p>SA2. fill up appropriate technical forms, process charts, activity logs as per organizational format in English and/or local language</p> <p>SA3. convey and share technical information clearly using appropriate language</p> <p>SA4. check and clarify task-related information</p> <p>SA5. liaise with appropriate authorities using correct protocol</p> <p>SA6. communicate with people in respectful form and manner in line with organizational protocol</p>
	Numerical and computational skills
	<p>The user/ individual on the job needs to know and understand how to:</p> <p>SA1. undertake numerical operations, and calculations/ formulae</p> <p>Numerical computations: addition, subtraction, multiplication, division, fractions and decimals, percentages and proportions, simple ratios and averages</p> <p>SA2. identify and draw various basic, compound and solid shapes as per dimensions given</p> <p>Basic shapes: square, rectangle, triangle, circle</p> <p>Compound shapes: involving squares, rectangles, triangles, circles, semi-circles, quadrants of a circle</p>

CSC/ N 0801: Calibrate mechanical, hydraulic and pneumatic measuring and control equipment

	<p>Solid shapes: cube, rectangular prism, cylinder</p> <p>SA3. use appropriate measuring techniques and units of measurement</p> <p>SA4. use appropriate units and number systems to express degree of accuracy</p> <p>Units and number systems representing degree of accuracy: decimals places, significant figures, fractions as a decimal quantity</p> <p>SA5. interpret and express tolerance in terms of limits on dimensions</p> <p>SA6. calculation of the value of angles in a triangle</p> <p>Angles in a triangle: right-angled, isosceles, equilateral</p> <p>SA7. identify the correct order for performing mathematical operations and solve equations that contain multiple operations</p> <p>SA8. use basic algebra to solve for the unknown</p> <p>SA9. convert between various angular units such as degrees, minutes, seconds, grads, radians, etc.</p> <p>SA10. interpret tables and graphs to determine intermediate and extrapolated values</p> <p>SA11. calculate the slope, intercept, and linearity of data sets, and interpret graphs and plots that illustrate these aspects of data</p> <p>SA12. convert various units of measurement between English and metric units, including length, area, volume, capacity, and weight</p> <p>SA13. describe and define the seven base units: meter, kilogram, second, ampere, kelvin, candela, and mole</p> <p>SA14. identify fundamental constants c (velocity or speed of light in a vacuum), g (gravitational constant), and R (universal gas constant), their standard symbols, and their common applications</p>
	<p>Learning</p> <p>The user/individual on the job needs to know and understand how to:</p> <p>SA15. participate in on-the-job and other learning, training and development interventions and assessments</p> <p>SA16. clarify task related information with appropriate personnel or technical adviser</p> <p>SA17. seek to improve and modify own work practices</p> <p>SA18. maintain current knowledge of application standards, legislation, codes of practice and product/process developments</p>
<p>B. Professional Skills</p>	<p>Problem Solving</p> <p>The user/individual on the job needs to know and understand how to:</p> <p>SB1. identify problems with work planning, procedures, output and behavior and their implications</p> <p>SB2. prioritize and plan for problem solving</p> <p>SB3. communicate problems appropriately to others</p> <p>SB4. identify sources of information and support for problem solving</p> <p>SB5. seek assistance and support from other sources to solve problems</p> <p>SB6. identify effective resolution techniques</p> <p>SB7. select and apply resolution techniques</p> <p>SB8. seek evidence for problem resolution</p> <p>Plan and Organize</p>

CSC/ N 0801: Calibrate mechanical, hydraulic and pneumatic measuring and control equipment

	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB9. plan, prioritize and sequence work operations as per job requirements</p> <p>SB10. organize and analyze information relevant to work</p> <p>SB11. basic concepts of shop-floor work productivity including waste reduction, efficient material usage and optimization of time</p>
	<p>Initiative and Enterprise</p>
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB12. undertake and express new ideas and initiatives to others</p> <p>SB13. modify work plan to overcome unforeseen difficulties or developments that occur as work progresses</p> <p>SB14. participate in improvement procedures including process, quality and internal/external customer/supplier relationships</p> <p>SB15. one's competencies in new and different situations and contexts to achieve more</p>
	<p>Self-Management</p>
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB16. exercise restraint while expressing dissent and during conflict situations</p> <p>SB17. avoid and manage distractions to be disciplined at work</p> <p>SB18. Manage own time for achieving better results</p>
	<p>Teamwork</p>
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB19. work in a team in order to achieve better results</p> <p>SB20. identify and clarify work roles within a team</p> <p>SB21. communicate and cooperate with others in the team for better results</p> <p>SB22. seek assistance from fellow team members</p>
	<p>Critical Thinking</p>
<p>The user/individual on the job needs to know and understand how to:</p> <p>SB23. apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action</p>

CSC/ N 0802: Calibrate electrical and electronic measuring and control equipment

	<p>KB34. methods of determining procedures KB35. procedures for reporting faults KB36. difference between real and potential faults KB37. procedures for recording/documenting test and calibration results KB38. function and procedures for zero, span and range checks on instrumentation systems/equipment KB39. equipment required to carry out the calibration of instrumentation systems/equipment</p>
Skills (S) [Optional]	
A. Core Skills/ Generic Skills	Communication
	<p>The user/ individual on the job needs to know and understand how to:</p> <p>SA1. read and interpret information correctly from various job specification documents, manuals, health and safety instructions, memos, etc. applicable to the job in English and/or local language SA2. fill up appropriate technical forms, process charts, activity logs as per organizational format in English and/or local language SA3. convey and share technical information clearly using appropriate language SA4. check and clarify task-related information SA5. liaise with appropriate authorities using correct protocol SA6. communicate with people in respectful form and manner in line with organizational protocol</p>
	Numerical and computational skills
<p>The user/individual on the job needs to know and understand how to:</p> <p>SA7. undertake numerical operations, and calculations/ formulae Numerical computations: addition, subtraction, multiplication, division, fractions and decimals, percentages and proportions, simple ratios and averages SA8. identify and draw various basic, compound and solid shapes as per dimensions given Basic shapes: square, rectangle, triangle, circle Compound shapes: involving squares, rectangles, triangles, circles, semi-circles, quadrants of a circle Solid shapes: cube, rectangular prism, cylinder SA9. use appropriate measuring techniques and units of measurement SA10. use appropriate units and number systems to express degree of accuracy Units and number systems representing degree of accuracy: decimals places, significant figures, fractions as a decimal quantity SA11. interpret and express tolerance in terms of limits on dimensions SA12. calculation of the value of angles in a triangle Angles in a triangle: right-angled, isosceles, equilateral SA13. identify the correct order for performing mathematical operations and solve equations that contain multiple operations SA14. use basic algebra to solve for the unknown SA15. convert between various angular units such as degrees, minutes, seconds, grads, radians, etc. SA16. interpret tables and graphs to determine intermediate and extrapolated</p>	

CSC/ N 0802: Calibrate electrical and electronic measuring and control equipment

	<p>values</p> <p>SA17. calculate the slope, intercept, and linearity of data sets, and interpret graphs and plots that illustrate these aspects of data</p> <p>SA18. convert various units of measurement between English and metric units, including length, area, volume, capacity, and weight</p> <p>SA19. describe and define the seven base units: meter, kilogram, second, ampere, kelvin, candela, and mole</p> <p>SA20. identify fundamental constants c (velocity or speed of light in a vacuum), g (gravitational constant), and R (universal gas constant), their standard symbols, and their common applications</p> <p>Learning</p> <p>The user/individual on the job needs to know and understand how to:</p> <p>SA21. participate in on-the-job and other learning, training and development interventions and assessments</p> <p>SA22. clarify task related information with appropriate personnel or technical adviser</p> <p>SA23. seek to improve and modify own work practices</p> <p>SA24. maintain current knowledge of application standards, legislation, codes of practice and product/process developments</p>
<p>B. Professional Skills</p>	<p>Problem Solving</p> <p>The user/individual on the job needs to know and understand how to:</p> <p>SB1. identify problems with work planning, procedures, output and behavior and their implications</p> <p>SB2. prioritize and plan for problem solving</p> <p>SB3. communicate problems appropriately to others</p> <p>SB4. identify sources of information and support for problem solving</p> <p>SB5. seek assistance and support from other sources to solve problems</p> <p>SB6. identify effective resolution techniques</p> <p>SB7. select and apply resolution techniques</p> <p>SB8. seek evidence for problem resolution</p> <p>Plan and Organize</p> <p>The user/individual on the job needs to know and understand how to:</p> <p>SB9. plan, prioritize and sequence work operations as per job requirements</p> <p>SB10. organize and analyze information relevant to work</p> <p>SB11. basic concepts of shop-floor work productivity including waste reduction, efficient material usage and optimization of time</p> <p>Initiative and Enterprise</p> <p>The user/individual on the job needs to know and understand how to:</p> <p>SB12. undertake and express new ideas and initiatives to others</p> <p>SB13. modify work plan to overcome unforeseen difficulties or developments that occur as work progresses</p> <p>SB14. participate in improvement procedures including process, quality and internal/external customer/supplier relationships</p> <p>SB15. one's competencies in new and different situations and contexts to achieve</p>

CSC/ N 0802: Calibrate electrical and electronic measuring and control equipment

	more
	Self-Management
	The user/individual on the job needs to know and understand how to: SB16. exercise restraint while expressing dissent and during conflict situations SB17. avoid and manage distractions to be disciplined at work SB18. Manage own time for achieving better results
	Teamwork
	The user/individual on the job needs to know and understand how to: SB19. work in a team in order to achieve better results SB20. identify and clarify work roles within a team SB21. communicate and cooperate with others in the team for better results SB22. seek assistance from fellow team members
	Critical Thinking
The user/individual on the job needs to know and understand how to: SB1. apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

CSC/ N 1335: Use basic health and safety practices at the workplace

National Occupational Standard

Overview

This unit covers health, safety and security at the workplace. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment.

CSC/ N 1335: Use basic health and safety practices at the workplace

National Occupational Standard	Unit Code	CSC / N 1335
	Unit Title (Task)	Use basic health and safety practices at the workplace
	Description	<p>This OS unit is about knowledge and practices relating to health, safety and security that candidates need to use in the workplace. It covers responsibilities towards self, others, assets and the environment.</p> <p>It includes understanding of risks and hazards in the workplace, along with common techniques to minimize risk, deal with accidents, emergencies, etc.</p> <p>It covers knowledge of fire safety, common first aid applications, safe practices and emergency procedures.</p>
	Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> • Health and safety • Fire safety • Emergencies, rescue and first-aid procedures
Performance Criteria(PC) w.r.t. the Scope		
Element	Performance Criteria	
Health and safety	<p>The user/individual on the job should be able to:</p> <p>PC1. use protective clothing/equipment for specific tasks and work conditions</p> <p>Protective clothing: leather or asbestos gloves, flame proof aprons, flame proof overalls buttoned to neck, cuffless (without folds), trousers, reinforced footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, knee pads, particle masks, glasses/goggles/visors</p> <p>Equipment: hand shields, machine guards, residual current devices, shields, dust sheets, respirator</p> <p>PC2. state the name and location of people responsible for health and safety in the workplace</p> <p>PC3. state the names and location of documents that refer to health and safety in the workplace</p> <p>PC4. identify job-site hazardous work and state possible causes of risk or accident in the workplace</p> <p>Hazards: sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; welding radiation; hazardous surfaces(sharp, slippery, uneven, chipped, broken, etc.); hazardous substances(chemicals, gas, oxy-fuel, fumes, dust, etc.); physical hazards(working at heights, large and heavy objects and machines, sharp and piercing objects, tolls and machines, intense light, load noise, obstructions in corridors, by doors, blind turns, noise, over stacked shelves and packages, etc.) electrical hazards (power supply and points, loose and naked cables and wires, electrical machines and appliances, etc.)</p>	

CSC/ N 1335: Use basic health and safety practices at the workplace

	<p>Possible causes of risk and accident: physical actions; reading; listening to and giving instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness)</p> <p>PC5. carry out safe working practices while dealing with hazards to ensure the safety of self and others</p> <p>Safe working practices: using protective clothing and equipment; putting up and reading safety signs; handle tools in the correct manner and store and maintain them properly; keep work area clear of clutter, spillage and unsafe object lying casually; while working with electricity take all electrical precautions like insulated clothing, adequate equipment insulation, use of control equipment, dry work area, switch off the power supply when not required, etc.; safe lifting and carrying practices; use equipment that is working properly and is well maintained; take due measures for safety while working in confined places, trenches or at heights, etc. including safety harness, fall arrestors, etc.</p> <p>PC6. state methods of accident prevention in the work environment of the job role</p> <p>Methods of accident prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices, advice; instruction from colleagues and supervisors</p> <p>PC7. state location of general health and safety equipment in the workplace</p> <p>General health and safety equipment: fire extinguishers; first aid equipment; safety instruments and clothing; safety installations(eg fire exits, exhaust fans)</p> <p>PC8. inspect for faults, set up and safely use steps and ladders in general use</p> <p>Ladder faults: corrosion of metal components, deterioration, splits and cracks timber components, imbalance, loose rungs, missing/unfixed nuts or bolts, etc.</p> <p>Ladders set up: firm/level base, clip/lash down, leaning at the correct angle, etc.</p> <p>PC9. work safely in and around trenches, elevated places and confined areas</p> <p>PC10. lift heavy objects safely using correct procedures</p> <p>PC11. apply good housekeeping practices at all times</p> <p>Good housekeeping practices: clean/tidy work areas, removal/disposal of waste products, protect surfaces</p> <p>PC12. identify common hazard signs displayed in various areas</p> <p>Various areas: on chemical containers; equipment; packages; inside buildings; in open areas and public spaces, etc.</p> <p>PC13. retrieve and/or point out documents that refer to health and safety in the workplace</p>
--	--

CSC/ N 1335: Use basic health and safety practices at the workplace

	<p>Documents: fire notices, accident reports, safety instructions for equipment and procedures, company notices and documents, legal documents (eg government notices)</p>
<p>Fire safety</p>	<p>The user/individual on the job should be able to:</p> <p>PC14. use the various appropriate fire extinguishers on different types of fires correctly</p> <p>Types of fires: Class A: eg. ordinary solid combustibles, such as wood, paper, cloth, plastic, charcoal, etc.; Class B: flammable liquids and gases, such as gasoline, propane, diesel fuel, tar, cooking oil, and similar substances; Class C: eg. electrical equipment such as appliances, wiring, breaker panels, etc. (These categories of fires become Class A, B, and D fires when the electrical equipment that initiated the fire is no longer receiving electricity); Class D: combustible metals such as magnesium, titanium, and sodium (These fires burn at extremely high temperatures and require special suppression agents)</p> <p>PC15. demonstrate rescue techniques applied during fire hazard</p> <p>PC16. demonstrate good housekeeping in order to prevent fire hazards</p> <p>PC17. demonstrate the correct use of a fire extinguisher</p>
<p>Emergencies, rescue and first-aid procedures</p>	<p>The user/individual on the job should be able to:</p> <p>PC18. demonstrate how to free a person from electrocution</p> <p>PC19. administer appropriate first aid to victims where required eg. in case of bleeding, burns, choking, electric shock, poisoning etc.</p> <p>PC20. demonstrate basic techniques of bandaging</p> <p>PC21. respond promptly and appropriately to an accident situation or medical emergency in real or simulated environments</p> <p>PC22. perform and organize loss minimization or rescue activity during an accident in real or simulated environments</p> <p>PC23. administer first aid to victims in case of a heart attack or cardiac arrest due to electric shock, before the arrival of emergency services in real or simulated cases</p> <p>PC24. demonstrate the artificial respiration and the CPR Process</p> <p>PC25. participate in emergency procedures</p> <p>Emergency procedures: raising alarm, safe/efficient, evacuation, correct means of escape, correct assembly point, roll call, correct return to work</p> <p>PC26. complete a written accident/incident report or dictate a report to another person, and send report to person responsible</p> <p>Incident Report includes details of: name, date/time of incident, date/time of report, location, environment conditions, persons involved, sequence of events, injuries sustained, damage sustained, actions taken, witnesses, supervisor/manager notified</p> <p>PC27. demonstrate correct method to move injured people and others during an emergency</p>
<p>Knowledge and Understanding (K)</p>	

CSC/ N 1335: Use basic health and safety practices at the workplace

<p>A. Organizational Context (Knowledge of the company / organization and its processes)</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. names (and job titles if applicable), and where to find, all the people responsible for health and safety in a workplace.</p> <p>KA2. names and location of documents that refer to health and safety in the workplace.</p>
<p>B. Technical Knowledge</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KB1. meaning of “hazards” and “risks”</p> <p>KB2. health and safety hazards commonly present in the work environment and related precautions</p> <p>KB3. possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible</p> <p>KB4. possible causes of risk and accident Possible causes of risk and accident: physical actions; reading; listening to and giving instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness)</p> <p>KB5. methods of accident prevention Methods of accident prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices, advice; instruction from colleagues and supervisors</p> <p>KB6. safe working practices when working with tools and machines</p> <p>KB7. safe working practices while working at various hazardous sites</p> <p>KB8. where to find all the general health and safety equipment in the workplace</p> <p>KB9. various dangers associated with the use of electrical equipment</p> <p>KB10. preventative and remedial actions to be taken in the case of exposure to toxic materials Exposure: ingested, contact with skin, inhaled Preventative action: ventilation, masks, protective clothing/ equipment); Remedial action: immediate first aid, report to supervisor Toxic materials: solvents, flux, lead</p> <p>KB11. importance of using protective clothing/equipment while working</p> <p>KB12. precautionary activities to prevent the fire accident</p> <p>KB13. various causes of fire Causes of fires: heating of metal; spontaneous ignition; sparking; electrical heating; loose fires (smoking, welding, etc.); chemical fires; etc.</p> <p>KB14. techniques of using the different fire extinguishers</p> <p>KB15. different methods of extinguishing fire</p> <p>KB16. different materials used for extinguishing fire Materials: sand, water, foam, CO₂, dry powder</p> <p>KB17. rescue techniques applied during a fire hazard</p> <p>KB18. various types of safety signs and what they mean</p>

CSC/ N 1335: Use basic health and safety practices at the workplace

	<p>KB19. appropriate basic first aid treatment relevant to the condition eg. shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries</p> <p>KB20. content of written accident report</p> <p>KB21. potential injuries and ill health associated with incorrect manual handling</p> <p>KB22. safe lifting and carrying practices</p> <p>KB23. personal safety, health and dignity issues relating to the movement of a person by others</p> <p>KB24. potential impact to a person who is moved incorrectly</p>
Skills (S) [Optional]	
A. Core Skills/ Generic Skills	Reading and Writing Skills
	The user/individual on the job needs to know and understand how to:
	SA1. read and comprehend basic content to read labels, charts, signages
	SA2. read and comprehend basic English to read manuals of operations
	SA3. read and write an accident/incident report in local language or English
	Oral Communication (Listening and Speaking skills)
The user/individual on the job needs to know and understand how to:	
SA4. question coworkers appropriately in order to clarify instructions and other issues	
SA5. give clear instructions to coworkers, subordinates others	
Decision Making	
The user/individual on the job needs to know and understand how to:	
SA6. make appropriate decisions pertaining to the concerned area of work with respect to intended work objective, span of authority, responsibility, laid down procedure and guidelines	
B. Professional Skills	Plan and Organize
	The user/individual on the job needs to know and understand how to:
	SB1. plan and organize their own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
	Working with others
The user/individual on the job needs to know and understand how to:	
SB2. remain congenial while discussing and debating issues with co-workers	
SB3. follow appropriate protocols for communication based on situation, hierarchy, organizational culture and practice	
SB4. ask for, provide and receive required assistance where possible to ensure achievement of work related objectives	
SB5. thank coworkers for any assistance received	
SB6. offer appropriate respect based on mutuality and respect for fellow workmanship and authority	

CSC/ N 1335: Use basic health and safety practices at the workplace

	Problem Solving
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB7. think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)</p> <p>SB8. identify immediate or temporary solutions to resolve delays</p> <p>SB9. identify sources of support that can be availed of for problem solving for various kind of problems</p> <p>SB10. seek appropriate assistance from other sources to resolve problems</p> <p>SB11. report problems that you cannot resolve to appropriate authority</p>
	Analytical Thinking
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB12. identify cause and effect relations in their area of work</p> <p>SB13. use cause and effect relations to anticipate potential problems and their solution</p>

CSC/ N 1336:

Work effectively with others

National Occupational Standard

Overview

This unit covers basic practices that improve effectiveness of working with others in an organizational set-up.

CSC/ N 1336:

Work effectively with others

Unit Code	CSC / N 1336
Unit Title (Task)	Work effectively with others
Description	<p>This unit covers basic etiquette and competencies that a candidate is required to possess and demonstrate in their behavior and interactions with others at the workplace.</p> <p>These cover areas such as communication etiquette, discipline, listening, handling conflict and grievances.</p>
Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> Working with others
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Working with others	<p>The user/individual on the job should be able to:</p> <p>PC1. accurately receive information and instructions from the supervisor and fellow workers, getting clarification where required</p> <p>PC2. accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt</p> <p>PC3. give information to others clearly, at a pace and in a manner that helps them to understand</p> <p>PC4. display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible</p> <p>PC5. consult with and assist others to maximize effectiveness and efficiency in carrying out tasks</p> <p>PC6. display appropriate communication etiquette while working</p> <p>Communication etiquette: do not use abusive language; use appropriate titles and terms of respect; do not eat or chew while talking (vice versa)etc.</p> <p>PC7. display active listening skills while interacting with others at work</p> <p>PC8. use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism</p> <p>PC9. demonstrate responsible and disciplined behaviors at the workplace</p> <p>Disciplined behaviors: e.g. punctuality; completing tasks as per given time and standards; not gossiping and idling time; eliminating waste, honesty, etc.</p> <p>PC10. escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict</p>
Knowledge and Understanding (K)	
A. Organizational Context (Knowledge of the company / organization and its processes)	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions</p> <p>KA2. reporting structure, inter-dependent functions, lines and procedures in the work area</p> <p>KA3. relevant people and their responsibilities within the work area</p> <p>KA4. escalation matrix and procedures for reporting work and employment related issues</p>

CSC/ N 1336:

Work effectively with others

B. Technical Knowledge

The user/individual on the job needs to know and understand:

- KB1. various categories of people that one is required to communicate and co-ordinate with in the organization
- KB2. importance of effective communication in the workplace
- KB3. importance of teamwork in organizational and individual success
- KB4. various components of effective communication
- KB5. key elements of active listening
- KB6. value and importance of active listening and assertive communication
- KB7. barriers to effective communication
- KB8. importance of tone and pitch in effective communication
- KB9. importance of avoiding casual expletives and unpleasant terms while communicating professional circles
- KB10. how poor communication practices can disturb people, environment and cause problems for the employee, the employer and the customer
- KB11. importance of ethics for professional success
- KB12. importance of discipline for professional success
- KB13. what constitutes disciplined behavior for a working professional
- KB14. common reasons for interpersonal conflict
- KB15. importance of developing effective working relationships for professional success
- KB16. expressing and addressing grievances appropriately and effectively
- KB17. importance and ways of managing interpersonal conflict effectively

Next two numbers	OS number	01

CRITERIA FOR ASSESSMENT OF TRAINEES

Job Role : Calibration Technician

Qualification Pack : CSC/ Q 0801

Sector Skill Council : Capital Goods Sector Skills Council

Guidelines for Assessment:

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below)
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria
5. To pass the Qualification Pack , every trainee should score a minimum of 70% in every NOS
6. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

Assessable Outcomes	Assessment Criteria	Total Marks	Out Of	Theory	Skills Practical
CSC/ N 0801 : Calibrate mechanical, hydraulic and pneumatic measuring and control equipment	PC1. comply with health and safety, environmental and other relevant regulations and guidelines at work	100	3	1	2
	PC2. adhere to procedures and guidelines for personal protective equipment (PPE) and other relevant safety regulations while performing fabrication and fitting operations		4	1	3
	PC3. work following laid down procedures and instructions		2	0	2
	PC4. ensure work area is clean and safe from hazards		2	0	2
	PC5. ensure that all tools, equipment, power tool cables, extension leads are in a safe and usable condition		2	0	2
	PC6. checks components, leads, fasteners, etc. for wear, loose connections or other faults		3	0	3
	PC7. produce and update relevant testing/calibration schedules and plans		3	0	3
	PC8. carry out the testing/calibration activities in the specified sequence and in an agreed timescale		5	2	3

PC9. work/test requirements are identified and defined to standard operating procedures	4	2	2
PC10. inspect and test the operation of instruments and systems to diagnose faults using testing devices	3	0	3
PC11. correct test application principles are selected after inspection of instrumentation systems, equipment/components	2	0	2
PC12. appropriate test equipment is selected in accordance with defined requirements	3	1	2
PC13. device isolation methods/requirements are observed and localized	2	0	2
PC14. appropriate test procedures and application principles are applied in assessing operation of instrumentation systems, equipment/components	4	0	4
PC15. report any instances where the testing/calibration activities cannot be fully met or where there are identified defects outside the planned schedule	3	0	3
PC16. complete relevant testing/calibration documentation accurately	2	0	2
PC17. test results are analyzed/verified against operational specifications and localized faults are confirmed	4	1	3
PC18. report potential and real faults using standard operating procedures	4	1	3
PC19. evaluate faulty conditions and plan corrective action	3	0	3
PC20. record action plan and document according to standard operating procedures	4	1	3
PC21. assess calibration of measuring and control equipment to manufacturers' specifications and/or standard operating procedures	6	2	4
PC22. calibrate equipment against appropriate physical standards using correct calibration tools, equipment, techniques using predetermined procedures	6	2	4
PC23. undertake zero, span and range checks on indicators/controllers using correct and appropriate configuration	4	0	4
PC24. perform methods of adjustment using calibration devices and document prescribed procedures and operational specifications	5	1	4

	PC25. re-commission equipment in accordance with standard operating procedures		5	2	3
	PC26. refer the problem to a competent internal/external specialist if it cannot be resolved		3	0	3
	PC27. obtain help or advice from specialist if the problem is outside his/her area of competence or experience		3	0	3
	PC28. monitor the problem and keep the supervisor informed about progress or any delays in resolving the problem		3	0	3
	PC29. comply with relevant legislation, standards, policies and procedures		3	0	3
		Total	100	17	83
CSC/ N 0802 : Calibrate electrical and electronic measuring and control equipment and systems	PC1. comply with health and safety, environmental and other relevant regulations and guidelines at work	100	3	1	2
	PC2. adhere to procedures and guidelines for personal protective equipment (PPE) and other relevant safety regulations while performing fabrication and fitting operations		4	1	3
	PC3. work following laid down procedures and instructions		2	0	2
	PC4. ensure work area is clean and safe from hazards		2	0	2
	PC5. ensure that all tools, equipment, power tool cables, extension leads are in a safe and usable condition		2	0	2
	PC6. checks components, leads, fasteners, etc. for wear, loose connections or other faults		3	0	3
	PC7. produce and update relevant testing/calibration schedules and plans		3	0	3
	PC8. carry out the testing/calibration activities in the specified sequence and in an agreed timescale		5	2	3
	PC9. work/test requirements are identified and defined to standard operating procedures		4	2	2
	PC10. inspect and test the operation of instruments and systems to diagnose faults using testing devices		3	0	3
	PC11. correct test application principles are selected after inspection of instrumentation systems, equipment/components		2	0	2
	PC12. appropriate test equipment is selected in accordance with defined requirements		3	1	2

PC13. device isolation methods/requirements are observed and localized	2	0	2
PC14. appropriate test procedures and application principles are applied in assessing operation of instrumentation systems, equipment/components	4	0	4
PC15. report any instances where the testing/calibration activities cannot be fully met or where there are identified defects outside the planned schedule	3	0	3
PC16. complete relevant testing/calibration documentation accurately	2	0	2
PC17. test results are analyzed/verified against operational specifications and localized faults are confirmed	4	1	3
PC18. report potential and real faults using standard operating procedures	4	1	3
PC19. evaluate faulty conditions and plan corrective action	3	0	3
PC20. record action plan and document according to standard operating procedures	4	1	3
PC21. assess calibration of measuring and control equipment to manufacturers' specifications and/or standard operating procedures	6	2	4
PC22. calibrate equipment against appropriate physical standards using correct calibration tools, equipment, techniques using predetermined procedures	6	2	4
PC23. undertake zero, span and range checks on indicators/controllers using correct and appropriate configuration	4	0	4
PC24. perform methods of adjustment using calibration devices and document prescribed procedures and operational specifications	5	1	4
PC25. re-commission equipment in accordance with standard operating procedures	5	2	3
PC26. refer the problem to a competent internal/external specialist if it cannot be resolved	3	0	3
PC27. obtain help or advice from specialist if the problem is outside his/her area of competence or experience	3	0	3
PC28. monitor the problem and keep the supervisor informed about progress or any delays	3	0	3

	in resolving the problem				
	PC29. comply with relevant legislation, standards, policies and procedures		3	0	3
		Total	100	17	83
CSC/ N 1335 : Use basic health and safety practices at the workplace	PC1. use protective clothing/equipment for specific tasks and work conditions	100	5	2	3
	PC2. state the name and location of people responsible for health and safety in the workplace		3	1	2
	PC3. state the names and location of documents that refer to health and safety in the workplace		3	1	2
	PC4. identify job-site hazardous work and state possible causes of risk or accident in the workplace		5	2	3
	PC5. carry out safe working practices while dealing with hazards to ensure the safety of self and others state methods of accident prevention in the work environment of the job role		4	2	2
	PC6. state location of general health and safety equipment in the workplace		3	2	1
	PC7. inspect for faults, set up and safely use steps and ladders in general use		5	2	3
	PC8. work safely in and around trenches, elevated places and confined areas		5	2	3
	PC9. lift heavy objects safely using correct procedures		5	2	3
	PC10. apply good housekeeping practices at all times		4	2	2
	PC11. identify common hazard signs displayed in various areas		5	2	3
	PC12. retrieve and/or point out documents that refer to health and safety in the workplace		3	1	2
	PC13. use the various appropriate fire extinguishers on different types of fires correctly		4	1	3
	PC14. demonstrate rescue techniques applied during fire hazard		4	1	3
	PC15. demonstrate good housekeeping in order to prevent fire hazards		3	1	2
	PC16. demonstrate the correct use of a fire extinguisher		4	1	3
	PC17. demonstrate how to free a person from electrocution		4	1	3

	PC18. administer appropriate first aid to victims where required eg. in case of bleeding, burns, choking, electric shock, poisoning etc.		4	1	3
	PC19. demonstrate basic techniques of bandaging		3	1	2
	PC20. respond promptly and appropriately to an accident situation or medical emergency in real or simulated environments		4	1	3
	PC21. perform and organize loss minimization or rescue activity during an accident in real or simulated environments		3	1	2
	PC22. administer first aid to victims in case of a heart attack or cardiac arrest due to electric shock, before the arrival of emergency services in real or simulated cases		3	1	2
	PC23. demonstrate the artificial respiration and the CPR Process		3	1	2
	PC24. participate in emergency procedures		3	2	1
	PC25. complete a written accident/incident report or dictate a report to another person, and send report to person responsible		4	1	3
	PC26. demonstrate correct method to move injured people and others during an emergency		4	1	3
		Total	100	36	64
CSC/ N 1336 : Work effectively with others	PC1. accurately receive information and instructions from the supervisor and fellow workers, getting clarification where required	100	10	3	7
	PC2. accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt		10	3	7
	PC3. give information to others clearly, at a pace and in a manner that helps them to understand		10	3	7
	PC4. display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible		10	3	7
	PC5. consult with and assist others to maximize effectiveness and efficiency in carrying out tasks		10	3	7
	PC6. display appropriate communication etiquette while working		10	3	7
	PC7. display active listening skills while interacting with others at work		10	3	7

	PC8. use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism		10	3	7
	PC9. demonstrate responsible and disciplined behaviors at the workplace		10	3	7
	PC10. escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict		10	3	7
		Total	100	30	70
